MEMORANDUM FOR THE COMPTROLLER, DIRECTORATE
OF SCIENCE AND TECHNOLOGY, CIA

SUBJECT: Additional Material Supporting
the FY 1970 Budget Estimates

In the OSD/BOB reviews of the FY 1970 DNRO Budget,
the BOB has requested supplemental data for the IDEALIST
Program as follows:

Number of operational missions ☐
and from other areas (identify) as accomplished
in FY 1967, FY 1968, forecast for FY 1969, and
estimated for FY 1970.

25X1

Inasmuch as similar information has been requested
for Senior Year, it is apparent that the BOB is attempting
to develop an issue whereby the IDEALIST Program would be
deleted or curtailed. Accordingly, in addition to the
number of operational missions, I should be provided as
soon as feasible with any pertinent information important
to issue considerations, such as periods when limitations
were placed on operational missions by the State Depart-
ment or other authorities.

The BOB also expressed an interest in being provided
with ☐ considerations when
developed. Aside from this request, a positive recommen-
dation for FY 1969 and/or 1970 or a withdrawal notifica-
tion from the Agency is needed by October 25, 1968 for
NRP Executive Committee budget review purposes.
